

# IQ.cash

Cryptocurrency for traders, investors and miners

THE FIRST **HYBRID** CRYPTOCURRENCY  
IN CRYPTOWORLD

# About IQ.cash

IQ.cash is universal large-scale blockchain platform for Traders, Investors & Miners. Its main goal is to provide instant anonymous online payments and investing. Cryptocurrency has millions of active users around the world and the number of people constantly grows very fast.

We create the first in the world hybrid coin/token cryptocurrency which includes 80% coin and 20% coin/token (Crypto Depository Receipt). IQ.cash is the best way to increase currency liquidity and to list tokens on exchanges closed for coins.

Investors will be able to exchange IQ receipt to IQ.cash with no limit on a 1 to 1 rate starting October 1 and get passive income from coins (ROI 500% according to the 1st of August). Miners can exchange IQ.cash to IQ receipt and get access to the maximum amount of crypto exchanges and sell their coins to investors.

IQ.cash team has developed and created Masternode network IQ for investors.

Now traders can trade IQ on cryptoexchanges. Investors with more than 3000 IQ can get passive income of 57% from the block, and miners get 43% from the block. The remaining 6% (24924 IQ monthly) reserved for DAO is used to invest in different trading projects like software, web sites, algorithmic trading systems, trading bots, startups, improvement of IQ.cash ecosystem and more.

This will allow IQ.cash to become a leader of crypto industry for traders and hold maximum efficiency and privacy payments among the largest financial companies.

# IQ.cash key features

## SECURITY

Cryptocurrency now has millions of active users in the world and number continues growing rapidly! The user's account can not be blocked, and the funds can not be accessed by anyone but its owner.

## MASTERNODE

IQ.Cash uses the algorithm consensus PoW with the masternode system support. This makes the project economically attractive for mining 43%, and provides passive income 57% to masternode holders. Masternode provides network integrity, anonymity of transactions and speed of transactions. How to get a Masternode: you have to invest 3000 IQ.

## ANONYMITY

Anonymity of transactions in the system is provided by the PrivateSend algorithm. Users can trust the system completely. They don't have to worry about third-party access to data, as the system securely encrypts data when transferring and receiving assets.

## ASIC RESISTANCE

Technology that solves the problem of significant acceleration of network complexity growth when using ASIC (in comparison with CPU usage). IQ.cash network uses NeoScript algorithm to solve this problem.

## TRANSACTIONS SPEED

High speed transactions ensured by the instantaneous exchange of data (InstantSend) across the network. The transaction time is about 5 seconds.

## DECENTRALIZATION

IQ.Cash network implies the inability of creating sites that have a dominant influence on the other members of the network. Influence on coins is also excluded as their release is limited, and additional emission is not provided.

# Block Reward Distribution

IQ.cash splits its block reward:

**57%** to Masternodes,

**43%** to Miners

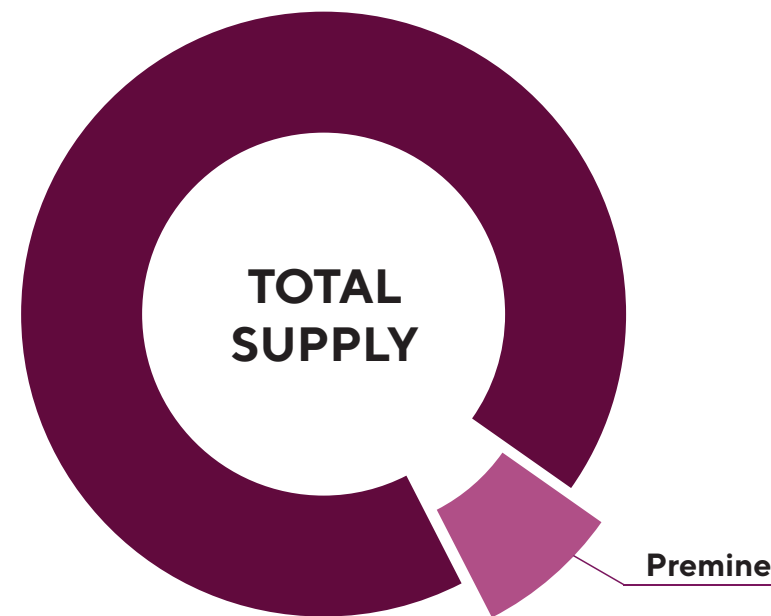

both fetched from (Reward-6%) formula

**6%** is reserved for Best Traders projects (DAO system)

**Superblock**  
(reserved for DAO) **6%**

**To Miners** **43%**

**To Masternodes** **57%**

# IQ receipt

We are happy to release Crypto Depository Receipt (IQ receipt).

We created the first ever hybrid coin/token cryptocurrency – IQ which includes 80% coin and 20% coin/token (Crypto Depository Receipt). IQ.cash is the best way to increase currency liquidity and to list tokens on exchanges, which are not closed for coins. FINEXPO depository with a premine fund of IQ.cash guarantees 1 to 1 exchange rate.

The price of tokens and coins will be increased due to obtained investments (ICO IQ receipt) which help to acquire listing on maximum amount of crypto exchanges (from August 1, 2018 to November 1, 2018).

Investors will be able to exchange IQ receipt with no limit to IQ.cash on a 1 to 1 rate starting October 1 and get passive income from coins (ROI 500% following data from August 1). Miners can exchange IQ.cash to IQ receipt and get access to the maximum amount of crypto exchanges and sell their coins to investors.

**IQ receipt:** ERC20 Total: 11 380 000 IQ tokens

Plan Listing **IQ receipt** on crypto exchanges after November 1, 2018: Yobit, Latoken, B2BX, IDEX, Hotbit, Qryptos, LiveCoin, Tidex, Lykky, Cobinhood, Hadex, BTC-Alpha, Ethfinex.

Directly trading **IQ.cash** is available now on CryptoBridge, Mercatox and Cryptopia.

Plan Listing **IQ.cash**: HitBtc, Kukoin, Exmo and next Binance, OKEx, Huobi.

# How to earn money with IQ.cash

- Mine IQ.cash and sell it to investors
- Mine IQ.cash or buy it, wait for its growth, then sell.
- Mine IQ.cash or buy it, create a MasterNode, get a 535% passive income (according to Masternodes online) and sell it constantly
- Mine IQ.cash or buy it, exchange it to IQ receipt and sell at more than 15 additional token markets with high liquidity
- Buy IQ receipt, wait for its growth, then sell
- Buy IQ receipt (more than 3000), exchange it to IQ.cash, create a MasterNode get a 535% passive income (according to Masternodes online) and sell it constantly

**IQ.cash**  **IQreceipt**

# Specification

Algorithm:	PoW, NeoScript (ASIC resistance)
Block time:	120 seconds
Reward per block:	23,5 IQ +1,5 IQ superbloc (24924 IQ - is a monthly reserved for DAO system)
Block Reward Distribution*:	57% to Masternodes, 43% to Miners and both fetched from (Reward-6%) formula, where 6% is reserved for DAO system  Block reward get sliced by 12% each year
Max coins:	56 900 000 IQ
Premine:	7 700 000 IQ (Finexpo Depository, partially converted into IQ receipt)
Mining out in:	25 years
Difficulty adjustment:	Each block (Dark Gravity Wave v3) - starts with 1000 block height
Required coins for masternode:	3 000 IQ
Privacy:	Transactions Obfuscation (PrivateSend)
Fast payments:	Through InstantSend (InstantSend confirmation: ~5 seconds)
P2P port:	14014/tcp
RPC port:	13013/tcp
IQ receipt:	ERC20
Max tokens:	11 380 000 IQ

\* Masternode reward starts with 1000 block height

# Roadmap

## Jun-Aug, 2018

- Website launch
- IQ.cash blockchain launch
- Wallet release for linux, windows and mac
- Mining pool release
- DAO release
- Initial listing on exchanges
- Bounty programs for traders

## Sep-Nov, 2018

- Website IQCentral development (for IQ community) masternode monitoring and budget voting made simple!
- Website redesign
- Second wave of exchange listings
- IQ receipt release on ERC20

## Dec, 2018 - Feb, 2019

- Mob. app. for Android
- Mob. app. for IOS
- IQcard and IQEX development
- IQ.cash payment system development
- B2B exchange integration development

## Mar-May, 2019

- Online payment service integration
- API and libraries development for partners integration
